Referring to my investigation on the reality behind the academic research and publishing, I have serious reasons to accuse the Springer Nature Group and other criminal organizations, listed in Appendix 1, of turning the lie into a marketable resource; of inducement and accessory to subsidy and insurance fraud; of conspiracy to suppress and to eliminate competition by unlawful censorship, misleading of the public, fakery, willful deception, brainwashing, corruption; of unjust enrichment; of conspiracy to commit anticonstitutional scienters and of other crimes.
